

Special Solutions Triple Piston Cylinder

MULTIPLE MOTION

HIGH FORCES

SERVICE LIFE

In the world of hydraulic systems, flexibility and compactness are often a decisive factor. That is why we are proud to present our triple piston cylinder to you. This cylinder is ideal for applications requiring high forces and multiple motions are required, such as for example in metal sintering presses.

Discover its advantages:

1. **Multiple motion:** Ideal for tools that require triple motion.
2. **Extremely compact size:** Perfect for travel movements in confined spaces.
3. **High forces:** Provides the necessary performance for demanding applications.
4. **Long service life:** With 4 million cycles per year, our cylinder is designed for continuous operation.

Our triple piston cylinder is particularly interesting for companies like Sandvik that operate in the fields of mining and rock extraction, rock processing, machining and materials technology.
